Queen Victoria's bathing machine: side view

10 POINTS

An **elevation** is a building drawn flat from the side. This is the real machine at Osborne, to scale. Copy it into the empty grid square by square: find the letter and the number, then draw what is in that square.

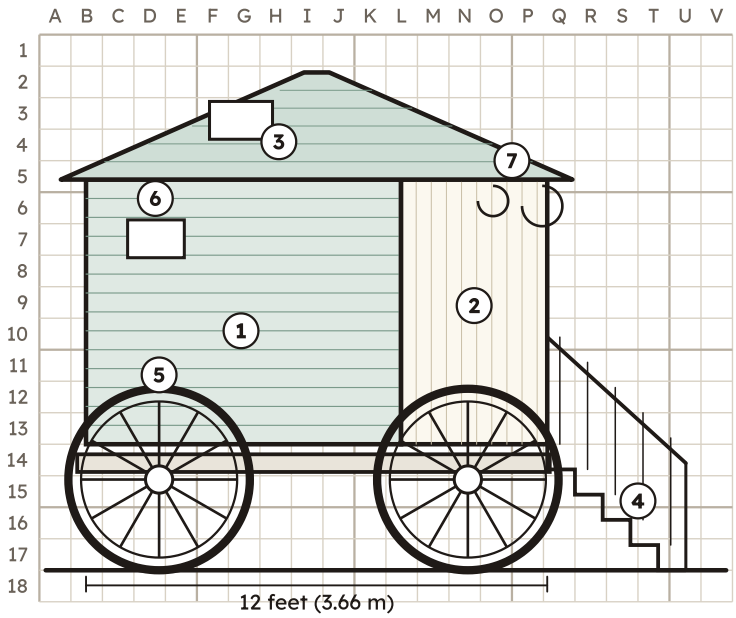

1. changing room
2. veranda
3. roof and skylight
4. steps to the sea
5. big wheel
6. little window
7. iron curls

The real one at Osborne today · grumpylumixuser, 2012, CC BY 3.0, via Wikimedia Commons

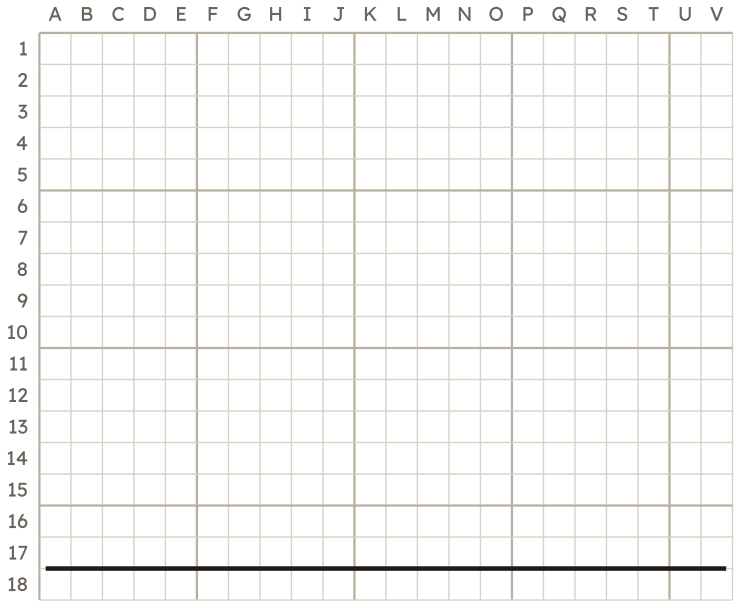

The real one

scale 1 to 60 · 1 square = 25 cm

My copy

start with the wheels, then the box, then the roof

Queen Victoria's bathing machine: plan

10 POINTS

A **plan** is the view from above, as if the roof had been lifted off. Thick lines are walls. Copy it into the empty grid square by square, then colour the changing room, the veranda and the steps.

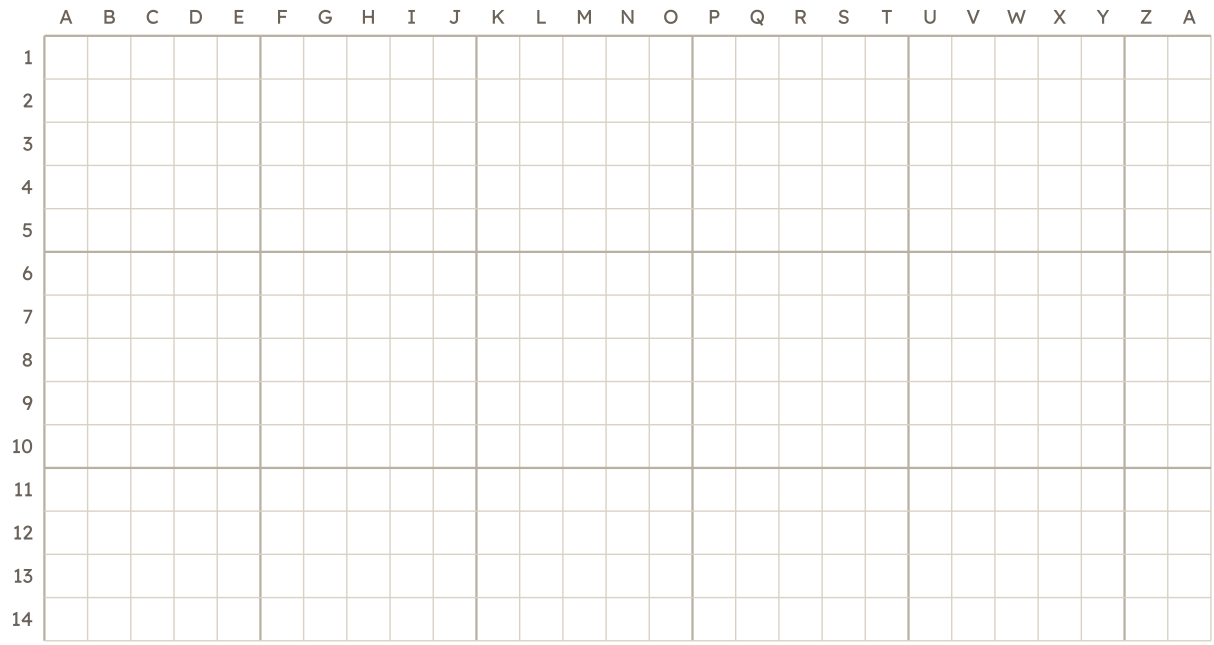

The real one

scale 1 to 35 · 1 square = 20 cm · 12 feet long and 7 feet wide

My copy

start with the walls

1. changing room
2. veranda
3. steps down to the sea
4. bench
5. the Queen's loo
6. door
7. curtains
8. wheel

The length and width, 12 feet by 7 feet, are the real ones (Emsworth Museum). Heights, wheels and steps are measured by eye from photographs, so they are close but not exact.
