My modern bathing machine

10 POINTS

First I drew it on paper. Then I built it in LEGO. It drives itself down to the sea, and it has a party on top.

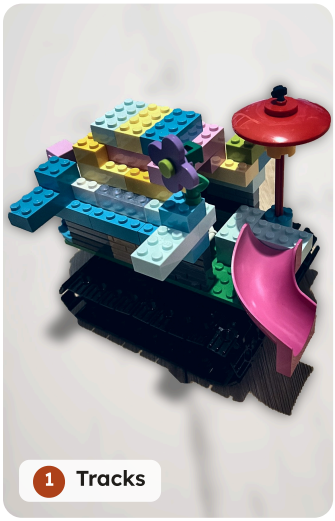

1. ### *Caterpillar tracks*
   Instead of wheels and a horse, it drives itself over the sand and into the sea.

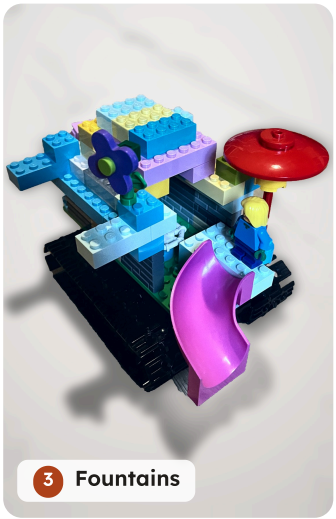

2. ### *A stage for a rock band*
   A round stage at the front, under the roof, so the band stays dry.

3. ### *Water fountains*
   At the top sides, to spray water and cool everybody down on a hot day.

4. ### *A slide with a shade*
   Climb up under the parasol and slide down into the sea.

1 Tracks

2 The stage

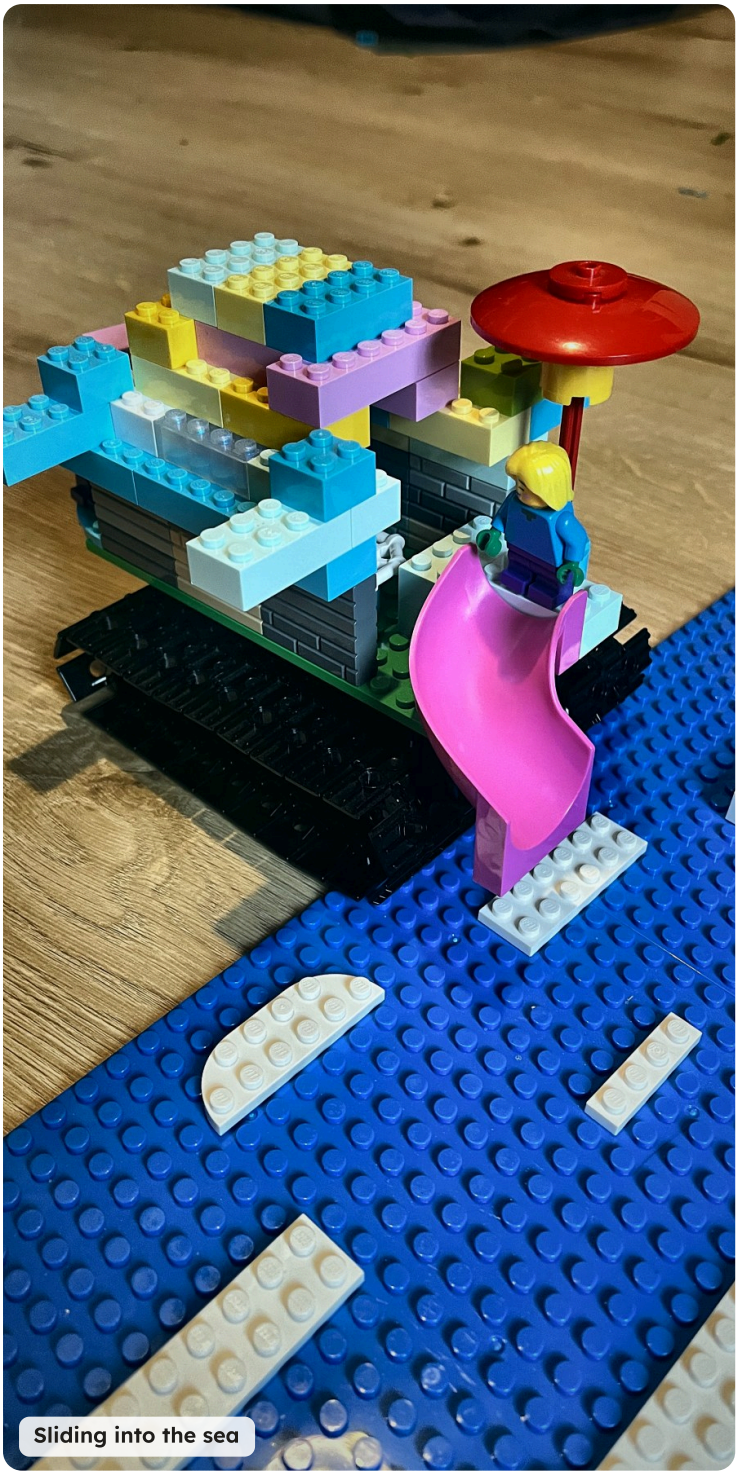

3 Fountains

4 The slide
